SUPPLEMENTARY MACHINE SERVICE BULLETIN #100B

SUBJECT: Motors for LA Model Machines

DATE: February 7, 1930

TO ALL OFFICES:

In Supplementary Machine Service Bulletin #100A, reference is made in the second paragraph to motor #1 for the LA model, which is of 105 volts specifications.

For your information, with this motor is used a condenser of 25 m. f. d. and a resistance of 350 ohms. It will be noted that this is the same condenser and resistance which is at present used with the motor of 110 volts specifications.

This information is to be filed with Machine Service Bulletin #100 and its Supplement A, for future reference.
